Education

BITS Pilani, Hyderabad Campus

B.E. in Computer Science and M.Sc. in Economics / CGPA: 8.21

Hyderabad, Telangana

Aug 2024 – May 2029

Delhi Public School, Ruby Park

High School Diploma in (PCM + CS) / 12th: 96.2% 10th: 96.2%

Kolkata, West Bengal

Aug 2009 – May 2024

Projects

Surge

July 2025 – Aug 2025

- Implemented background job processing with Redis and BullMQ to bypass strict CodeForces API rate limits.
- Implemented Markdown parsing to generate static pages at build.
- Containerized the application using Docker to ensure parity between the local and production deployment
- Aggregated user information from CodeForces and generated a campus leaderboard alongside other metrics.
- Achieved 200+ users within 48 hours of release.

Robotics Club Website

June 2025 – July 2025

- Designed the wireframe and prototype using Figma
- Implemented the design using React, AstroJS and TailwindCSS
- Implemented custom cursor and hover effects.
- Implemented a git based blog to document club projects and other activities

Experience

Assistant System Administrator

Hyderabad, Telangana

Sharanga HPC Cluster

June 2025 – present

- Automated bare-metal compute node provisioning by setting up a PXE boot server with a custom kickstart script, eliminating manual Rocky Linux OS installations.
- Maintained 98% cluster availability by proactively monitoring and managing failing storage disks within a RAID-Z2 array, ensuring zero data loss.
- Standardized the scientific software environment using Spack and Singularity containers, guaranteeing isolated and reproducible execution spaces for users.

Frontend Intern

Remote

Schmooze Inc.

Sept 2025 – Dec 2025

- Implemented a CI/CD pipeline utilizing GitHub Actions to automate site deployments to AWS S3 and CloudFront
- Developed a serverless edge OAuth handler for Decap CMS using Hono and AWS Lambda.
- Built an internal operational interface to aggregate reviewer feedback, improving automated account flagging.

President

Hyderabad, Telangana

CRUx, The Programming and Computing Club

Sept 2024 – present

- Setup and managed containers for our flagship CTF CruXipher, using Docker and CTFd
- Conducted a dualboot workshop for incoming freshers to promote linux use on campus.
- Managed deployment for ChronoFactorem, a timetable creation utility for our campus using Docker Compose

Technical Skills

Languages: Python, Bash, C/C++, SQL, TypeScript, JavaScript

Cloud & Infrastructure: AWS (S3, CloudFront, Lambda), Oracle Cloud, Docker, Ansible, Linux

Tools & Orchestration: Git, Spack, Singularity, CTFd, Redis, BullMQ, PostgreSQL

Web Technologies: Node.js, Express, Hono, Flask, React, Astro
